Ingredients:
- 1.5kg. Green Tomatoes
- 50g. Preserved Ginger – Finely Cut
- 3 Cups Sugar
- 1 Lemon
- 3 cups Water

Method:
Boil sliced Tomatoes with 3 cups of Water until soft.
Add Rind & Juice of 1 Lemon
Add Ginger
Add 3 cups Sugar and boil gently for 20 – 30 minutes.
Test on a cold Saucer until thickness suits.
Bottle & Seal

Note:
Keeping for 1 Month allows the Ginger flavour to intensify.

CHOCOLATE BEETROOT CAKE RECIPE
Ingredients:
- 175 grams Plain Flour
- 10 grams Baking Powder
- 75 grams Cocoa Powder
- 225 grams Caster Sugar
- 3 Eggs
- 225 grams Beetroot (Roasted, Peeled & Chopped)
- 200 millilitres Corn Oil

Chocolate Ganache Ingredients:
- 250 grams Dark Chocolate
- 250 millilitres Double Cream

Method:
Preheat the Oven to 200C / Gas Mark 6.
Grease & line a 20cm cake tin.
Sift the flour, baking powder, cocoa powder & sugar into a bowl.
Blend the eggs, beetroot & corn oil in a blender until smooth.
Fold the beetroot mixture into the dry ingredients.
Bake for 40 (forty) minutes.

Ganache:
Put the double cream into a saucepan & simmer gently until just before it reaches boiling point.
Break the chocolate into pieces and put into a mixing bowl.
Pour the warmed double cream onto the broken chocolate & mix gently until the two are blended together to make a silky chocolate icing.

Method Continued:
Remove the cake from the oven and leave to cool.
Once chilled, generously cover the cake with the chocolate ganache.

'SPUD IN A BUCKET'

The aim is to plant your Potato (Spud) in your Bucket and get it growing as soon as you can, to get the best possible crop by judging day.

Entrants then bring their Potato’s (Spuds) – still growing in their Bucket with their Name, Age and School written on the side of their Bucket along to the show.

Here’s What Our Experts Recommend to Grow Your Potato (Spud)

Put a layer of gravel, stones, broken crockery pieces or similar material in the base of your Bucket so it drains well. (We have already put holes in the bucket to assist drainage.)

Fill the Bucket with growing media. (Example) Soil or Container mix, with a handful of Fertiliser mixed in.

Plant your Seed Potato about 50mm under the surface. The Tubers will grow below it.

Water well and then cover the top of the Bucket with plastic. Keep the plastic on until sprouts emerge, then take it off.

Water the plant when necessary. (Don’t let it dry out too much, but don’t keep the soil soggy either.)

Sometimes the plants catch blight and get greeny-black blotches on their leaves and stems. They may need to be sprayed with a copper-based spray. Ask Parents or Teachers about this.

If by February the Potato plant itself has gone brown or died off altogether – that’s okay! This is what happens to Potato plants when they mature. Bring it along to the weigh-in just as it is, we will tip it out and weigh it along with all those still growing.

Mr Potato Head says, “Good Luck”

GROWING GIANT PUMPKINS

Pumpkins prefer a ‘Full Sun’ location, sheltered from the wind.

- Dig 1 metre deep holes 3-4 metres apart and blend in lots of well rotted manure and mulch. The more the merrier! The end result should be a raised mound that will settle down over time. Generous amounts of a balanced fertilizer should also be applied well in advance into the mounds. Sow seeds or transplant out after last frosts have passed. Traditionally Labour Weekend (late October) in most areas.
- Keep well watered to encourage deep rooting and vigorous growth.
- When the plants start to run, bury the vine with only the leaf and half the leaf stalk showing, making the plant put down more roots from the base of each leaf axial, anchoring the plant and helping the uptake of water and nutrients.
- When the fruit start to set, thin to the single best fruit on each vine.
- Pumpkins can put on up to 5kg weight a day if watered well through the summer months so soak well every day. Watering is best done first thing in the morning.
- Place a thick layer of straw, shredded newspaper or cardboard under the fruit while small to help prevent rot setting in on the underside.
- The pumpkin will have reached its maximum size when the vine starts to die back down, usually after 120 days.
- Fruit colour can vary from yellow to orange and the skin is slightly rough.
- Cut the pumpkin from the vine leaving a wick at least 20cm long.
- Slide a large strong board underneath and get your friends to help you lift it.

THE WORLD RECORD IS OVER 495KG!!
